

**Are you ready
to face the truth about your
production processes?**

The logo consists of a blue square with rounded corners. Inside the square, the word "MARK" is written in white, bold, uppercase letters. A small red square is positioned in the top right corner of the blue square.

MARK

Real facts. Real time. Instant results.

With accurate facts regarding utilization of goods, labour and resources – you have your finger firmly on the pulse.

To make mission-critical decisions, getting the real facts in real time is essential.

With ProMark, each improvement is visible, instantly.

For complete control of production processes - get real

In manufacturing, the only way to achieve true operational efficiency is to get real. Facing the real facts, in real time, will reveal more than the truth about your production processes, it will help you uncover your operational advantage. At Mark Information, we help manufacturers take control of the processes that make a real difference to the bottom line.

Accurate data, seamless integration

ProMark is our robust software solution that brings the shop-floor action directly to the decision-maker's desk, providing the essential overview of each step in your production process. Seamlessly integrated with your existing ERP and payroll system, ProMark is a powerful data collection and operational plan-

ning tool that gives you the real-time, mission-critical data you need to optimize production plans and allocate resources where they're needed the most.

Benefits:

Real-time lean data collection

– ProMark forms the basis for your ongoing optimization processes whether you use Six Sigma, lean manufacturing, BPR or other methods.

Improved visibility

– ProMark creates the rock-solid data foundation that gives visibility of your manufacturing process.

Improved asset management

– By providing real data about machine and equipment usage, you can more effectively manage your plant assets.

Faster ROI

– With an average implementation time of just 90 days, ProMark helps you realise your return on investment, fast.

Instant re-planning

– ProMark allows you to adjust existing plans for optimal utilization of resources, goods and labour and increased agility on the shop floor.

Increased productivity

– Measuring the value-creating and the non-value-creating working hours gives you the data to boost productivity where and when it's needed.

Reduced tied capital

– Releasing the capital tied up in production facilities is a key step to boosting your competitive edge.

A comprehensive overview for Supervisors at Rockwool

“Mark Information's user-friendly system has created an effective planning tool for company managers responsible for combining orders, resources and employees.”

Rockwool A/S

EFFICIENCY

ACCURACY

PROFITABILITY

AGILITY

OPTIMIZATION

Helping you pinpoint your business pains

For over 25 years, we've helped manufacturers identify and address their business pains:

- Excessive and costly stock inventories
- Late, poor-quality deliveries to customers
- Inefficient use of machinery and people
- Time-consuming administration procedures

Working together with IT, payroll and production staff, our ProMark specialists are able to pinpoint the pains that are affecting your production performance and quickly implement a solution that gives you the competitive advantage.

Experience the real difference

We provide the tool to constantly monitor, adjust and optimize mission-critical business processes in real time. Experience the difference that real facts, in real time can make to your business and uncover your true operational advantage. Contact us at www.mark-info.co.uk or call us to arrange a demonstration.

Meneta in the fast lane with ProMark and SAP

"In ProMark we collect data which tell us how our production has flown, how many units have been produced and how much time has been spent producing each separate order. The combination of SAP and ProMark enables us to treat data quickly and efficiently."
